

SPECIFICATION

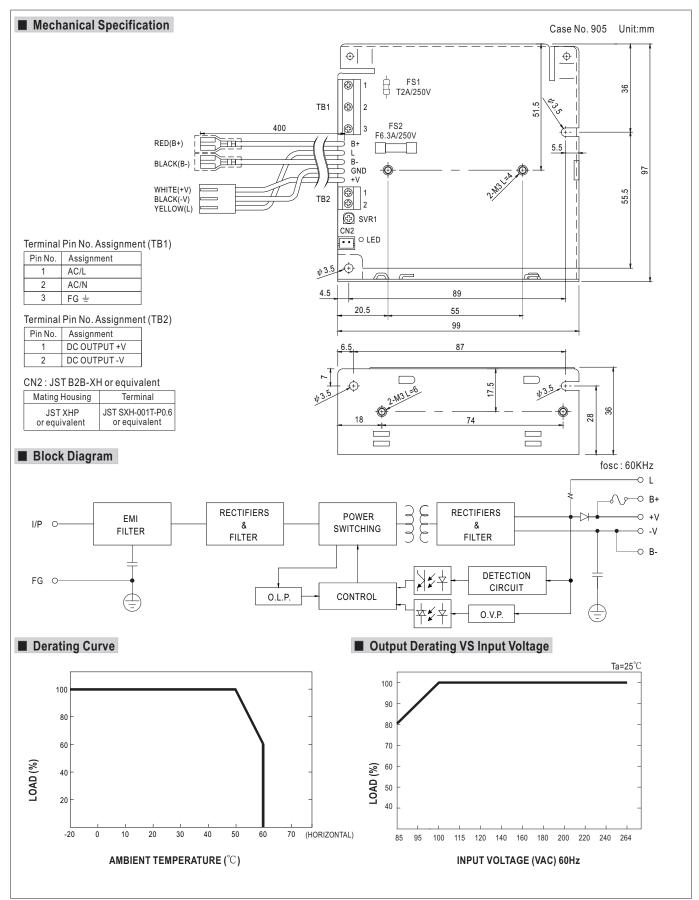

■ Features :

- Universal AC input/Full range
- Protections: Short circuit / Overload / Over voltage / Battery polarity protections (by fuse)
- Built-in temperature compensation function
- Output voltage detection signal
- Cooling by free air convection
- LED indicator for power on
- No load power consumption < 0.75W
- * Suitable for installation in metallic or non-metallic system enclosure
- 100% full load burn-in test
- 2 years warranty

DC VOLTAGE 13.8V 27.6V	MODEL		SCP-35-12	SCP-35-24

1 \ - · · · · · · · · · · · · · · · · · ·	NOTE					

■ Function Description

1.B+,B-

Connect the battery: B+ connected to battery positive.
B- connected to battery negative.

2.L

Output voltage detection, detect output voltage or battery voltage (if battery is used).

	Voltage of L Pin			
AC OK	Output voltage +0.2~0.7V(depends on Vf of diode)			
AC Fail	0V			

3.+V,-V

Output voltage. Can't connect the battery.

4 CN2

Temperature sensor can be connected to the unit to allow temperature compensation of the charging voltage.

If the sensor is not used, the charger still works normally.

Reference example: (Under rated DC output voltage)

Connect $100 \mathrm{K}\,\Omega$ NTC Thermistor(THINKING TTC3A104F4193EY)To CN2). The output voltage will change along with the temperature change. If the output voltage is adjusted other than the rated value by internal potential meter, please consult Meanwell for suitable value of Thermistor.
